Onpoint SYMBIO

Onpoint Symbio is a production management system for print on demand. A solution for printers of all sizes, Onpoint Symbio automates the flow of print from order receipt through shipping, and integrates with many leading hardware and software platforms. Symbio can act as the central nervous system of your POD workflow and will even support pre-press and production management for both digital and conventional printing.

FEATURES

- dynamic ticket creation
- automatic file retrieval
- intelligent job routing
- equipment-specific preflight
- dynamic imposition
- JDF-enabled communications
- integrated shipping

BENEFITS

- reduce manual steps
- reduce production costs from 20-80%
- increase production speed up to 300%
- maximize capacity on existing equipment investments
- maintain chain of ownership for FSC

ONPOINT SYMBIO PLATFORM

Onpoint Symbio is interoperable with leading hardware and software systems including: Xerox iGen, HP Indigo, Canon c7000, NexPress, Prinergy, ApogeeX, and more. The system is built using open standards and can be integrated into your existing management and production systems. Symbio provides the central nervous system for automated POD production. It provides the connective tissue between the systems you already use; providing end-to-end automation, reduced cost, and increased speed.

	Submissions	Pre-press	Production	Finishing	Reconciliation
Task Time Reduction	11 minutes	17 minutes	4 minutes	11 minutes	6 minutes
Lead Time Reduction	222 minutes	127 minutes	260 minutes	390 minutes	90 minutes
				Total Task Reduction	49 minutes
				Total Lead Reduction	18 hours

(Based on digital production of (500) 8.5 x 11 two-sided brochures.)
